

SP-445 Film Holder mod for 9x12

Stearman Press LLC

8 August 2016

We recommend "mirroring" the other side.
Another option: modify only one side and leave the other for 4x5.
Use any model plastic glue or acetone to "weld" the new rail in place.
Plastic from: StripStyrene, Evergreen Scale Models, 1/4" Channel #267, Cut to length
You can substitute any weldable plastic.
